FURNITURES FOR OTHERS PURPOSES

Coat rack – 3 compartments (crescent-shaped sides)

www.mobeduc.com

Ref.: 600618A

Furniture with 3 compartments with crescent-shaped sides, manufactured from 19 mm beech melamine and 2 mm PVC edges, finished for both sides. There are 3 swivel hooks made of polypropylene with rounded corners to hand the clothes of the child. Removable furniture with rounded edges to prevent cuts or wounds. Our furniture has no sharp edges making it extra safe for children. Assembly through sleeves with zoon system, ensuring solid and rigid union.

MOBeduc complies with TECNALIA certification (Safety & Quality standards) in the manufacture of nursery and primary furniture.

TECNALIA offers a global service to the furniture sector by testing and certifying the behaviour of finished furniture and of each of its components with the following methodology:

- Initial inspection of our system of production and control.
- Initial test about the type of product.
- Surveillance, monitoring and evaluation of the quality system.
- Test of raw materials using random samples.
- Test of finished product using random samples.

Fence

www.mobeduc.com

N

Ref.: 600643

Fence to create enclosed spaces with total visibility, playgrounds, separation of space, etc.

Manufactured DM melamine thick with rounded edges and painted with nontoxic varnish.

Side anchors in solid beech wood, providing more strength at the junction between fences. These anchors allow different angle positions giving us multiple combinations of contour.

Finished on both sides.

Possibility to choose front decoration, open (as shown in the photo) or blind (with logo MOBeduc).

MOBeduc complies with TECNALIA certification (Safety & Quality standards) in the manufacture of nursery and primary furniture.
